

Detecting, Measuring, Controlling

TELEDYNE INSTRUMENTS

Location: City of Industry, CA

Teledyne Instruments is a group of business units with expertise in monitoring, process control and precision measurement instrumentation. We guide with technology, manufacturing skills and exceptional resources that conceive and deliver superior instruments to detect, measure and control critical parameters.

Within this portfolio are summaries of the activities of Teledyne Instruments business units. Each review features how our technological advancements integrate into our products and where those products fit in a broad base of industry applications.

Rarely has such a combination of minds, abilities, and experience in this unique discipline been connected to provide the marketplace with so many reliable and high performance instruments and services. While each business unit in the group has a notable past with stellar successes and achievements in manufacturing and service excellence, it is our sharp focus on significant developments in science and industry which drives us to maintain our competitive edge through continual evolution applying the latest technologies to develop innovative instrumentation solutions that solve industries latest challenges.
